

Chapter 4: Advanced Binary Search Trees (Page 1)

Section 1.1 covers tree balancing principles and rotation mechanics.

Chapter 4: Advanced Binary Search Trees (Page 2)

Section 2.1 covers tree balancing principles and rotation mechanics.

Chapter 4: Advanced Binary Search Trees (Page 3)

Section 3.1 covers tree balancing principles and rotation mechanics.

Chapter 4: Advanced Binary Search Trees (Page 4)

Section 4.1 covers tree balancing principles and rotation mechanics.

Chapter 4: Advanced Binary Search Trees (Page 5)

Section 5.1 covers tree balancing principles and rotation mechanics.

Chapter 4: Advanced Binary Search Trees (Page 6)

Section 6.1 covers tree balancing principles and rotation mechanics.

Chapter 4: Advanced Binary Search Trees (Page 7)

Section 7.1 covers tree balancing principles and rotation mechanics.

Chapter 4: Advanced Binary Search Trees (Page 8)

Section 8.1 covers tree balancing principles and rotation mechanics.

Chapter 4: Advanced Binary Search Trees (Page 9)

Section 9.1 covers tree balancing principles and rotation mechanics.

AVL Rotations

```
struct Node * rotRight(struct Node * y){  
  
    struct Node * x = y->left  
  
    y->left = x->right  
  
    x->right = y;  
  
    return x; }
```

LL case (left-left heavy):

$bf(30) = h(L) - h(R) = 2 \rightarrow$ unbalanced

after rotation all $bf = 0$, balanced
